Clarification of Tennis Hardcourt and Pickleball Court Usage

There is no set rule or policy as to when a pickleball or tennis game starts or finishes. Just because a tennis game is taking place before the pickleball starting time doesn't mean that the pickleball players have to wait until the tennis match is over before they begin play. The only exception to this is when there is an inter-club tennis match. Then pickleball players must wait until the match is over before they can play. There are only about 5 of these matches per year.

It is important for all participants to be courteous and cooperative when sharing this space.

Thank you for your cooperation.
