It's that time again...

Time to get out your bathing suits, water shoes, sunglasses, and waterbells (if you have them). Your summer home is open and looking wonderful with a new bottom and new filtering system. It's a beautiful sight to behold!

One reminder, if you are going to use water shoes, which I definitely recommend, please do not put them on until you get inside the pool gate. We want to help preserve the new surface on the bottom of the pool. Thank you.
