

New Move Ins to Hershey's Mill

(July 2018)

Welcome to Hershey's Mill! It is a great place to live.

Hershey's Mill has a Triple Play Bulk Plan unlike any other Bulk Plan anywhere else in the Country. You may get a Call Center Agent who is not as familiar with the HM Bulk Plan as we would like them to be and you must know the HM Bulk Plan 'Rights' before you place the call to order your services and equipment. You will be opening a new Bulk Account under the HM Bulk Plan. We also have some Security requirements that are dependent on Verizon services and are detailed below.

Please read All of the information provided below before placing the call to the Call Center and follow ALL the instructions below. Do Not call 1-800-Verizon for any reason - that is a retail number and we are a bulk community.

Please read all the way through, including the Attachments at the end that provide detailed information on several key areas, prepare and then place the call to set up your bulk account, order services and equipment and schedule an installation date. *Ordering a Battery Back Up^{*1} is highly recommended and is mandatory in some villages.*

What is included in the Hershey's Mill bulk package and paid for in HOA Fees:

- Equipment: 1 HD Set Top Box
 - 1 FiOS Dual Band Router
- TV Channel Package: Preferred HD
- High Speed Internet: 150/150 Mbps
- Phone: Digital Voice Unlimited Calling Nationwide, Canada and Puerto Rico

SPECIAL NOTES:

- Weekend installation appointments are available.
- Watch where Techs plug into electrical receptacles. The top electrical receptacle in most homes in HM is controlled by the Wall Switch. Be sure they plug into the lower receptacle.
- Amazon's Echo Dot (Alexa) works much better than a Remote with Voice Commands. Verizon does not offer a voice remote as yet (July 2018). With a remote, one must pick up the remote, depress the Mic button, wait for the Mic to activate, then speak. With 'Alexa', all that must be done is to say, "Alexa, change to or find X,Y,Z". Alexa works with DVR Level 2 or 3.

There are a couple of things to do:

- 1) Contact your Village Council and ask to add your personal email address to the Village distribution list, if you have not already done so. This is the way we communicate important information here in Hershey's Mill. To locate your Village Council visit hersheymill.org, click on the Villages tab at the Top of the page, go to your village. There will be a listing on your Village page for your Village Managing Agent. Send the Village Managing Agent an email with your name, contact information, HM address, Settlement Date and Move In Date. Ask to be added to the Village email Distribution List. Ask the Managing Agent to verify receipt of your email and that you have been added to the list.
- 2) REQUIREMENTS: We are all required to provide **Dial Tone the day after Settlement Day, no matter what the Move In date may be,** for safety reasons and so our Alarm Panels can send a signal in case of Emergency or Fire. Daily fines may be levied until dial tone is provided. Phone service is included in the HM Bulk Plan, so there is no extra cost. **However,** there *must be an account in someone's name.* A name or a Trust or Company name is required on any phone line account.
- 3) A. Installing the phone first, the day after Settlement Day, and the TV and Internet the day after Move In Day is possible. NOTE: We do not schedule telephone installations on Settlement Day, because too many installation appointments have been missed due to settlement taking longer than planned.

B. If you wish to have telephone service installed before moving in, Call **now** to order a phone line with a 'new'*² number. Weekend installations are available. You will need to be present for the entire installation. Allow 4 to 5 hours for the entire process, just in case the Techs run into any problems; otherwise it should take well less than three hours.
- 4) 14 days before Move In Day, call the Call Center again and order the TV and Internet services desired. During this call, have your current telephone number 'ported' or brought over, if desired, and the 'new' telephone number cancelled on installation day.
 - A. **IMPORTANT:** Verizon will not install on Move In Day and will leave if movers are present and all personal equipment is not set in place, plugged in ready for the Verizon equipment installation process. So, make the installation appointment for a day or so after move in. Plan to spend the day available for the installation, so again, if the Techs run into any issues, you are not feeling pressured to leave.

B. If the Techs have to return to install any equipment that was not available, there will be an installation charge for the return visit. Be certain you will be fully prepared for the Techs with all equipment set in place and plugged in before scheduling your installation date. It often takes a day or two before all personal equipment is set up and ready for Verizon installation after the move in date.
- 5) NOTE: If you are moving in the day after Settlement Day, all services may be installed on the same day, as long as it is after Move In day.
- 6) Follow the Alarm Panel Test procedures with the Tech after telephone installation. This test is required to ensure your Alarm Panel is functioning properly and to avoid daily fines. Directions are in the document titled, "Alarm Panel Test".*³
- 7) SECURITY: Provide the 'new' phone number to Security as soon as it is installed, the day after Settlement Day. This is critical so if a Smoke Alarm triggers an Alarm Panel signal to Security,

they know which address it is coming from. It is also important because the phone number has to be programmed into our system to open the guest gates.

- 8) ~NOTIFY Security AGAIN when the permanent number is brought over, for the same reasons.
- 9) Please read all the way through the following and prepare before making the call.

Instructions to Set Up your Verizon FiOS Bulk Account, Order Equipment and Services and make an Installation Appointment

What is included in the Hershey's Mill bulk package and paid for in HOA Fees:

- Equipment: 1 HD Set Top Box

1 FiOS Dual Band Router

- TV Channel Package: **Preferred HD**
- High Speed Internet: **150/150 Mbps**
- Phone: **Digital Voice Unlimited Calling** Nationwide, Canada and Puerto Rico

To prepare for your call to open your HM Bulk Account, order services and equipment, follow the steps below:

- 1) Review the document below titled, "**Pricing Sheet**"^{*3} so you are prepared to order any *additional* equipment and services you may want. Refer to the '**Pricing Sheet**'^A for information on additional Services and Equipment. ^A*Prices subject to change.*

A. To setup your Verizon FiOS account you will need to have available:

- Your current Verizon account and Pin number, if you have a Verizon landline (this is not necessary if you are installing a 'new' number until you Move In)
 - Or Your current Comcast account number (this is not necessary if you are installing a 'new' number until you Move In)
 - Your current home phone number
- Be sure to unlock your credit if it is blocked before the call. If you are already a Verizon customer and your credit is blocked, it is not necessary to unlock it. If you need help, unlocking your Credit,*

please Google instructions for unblocking credit. There are some excellent instructions posted on the Internet.

B. Choose your additional TV equipment (billed to you monthly):

If you have more than one TV, you will need to choose equipment for each TV

- **Extra HD Set Top Box** -- \$12/mo
- **Digital Adapter** -- \$7.99/mo (no recorded shows, Guide or On Demand, good for kitchen, basement, guest bedroom)
- **DVR service** - \$12/mo – records two shows at a time, plays back in one room)
- **MultiRoom DVR** - \$20/mo (records 6 shows at a time and plays back in multiple rooms) or
- **MultiRoom DVR** - \$30/mo (records 12 shows at a time and plays back in multiple rooms)
- **Large Button Remote** – \$14.99 one time charge

C. Choose a TV Channel Package Upgrade (billed to you monthly):

If you want more channels than in the Preferred HD package, choose one below:

Extreme HD (~ 330+ Channels) -- \$5/mo (includes Golf, NBA, NHL, Tennis channels)

Ultimate HD (~ 435+ Channels) -- \$15/mo (includes NFL Red Zone & 3 of the Premium channels noted^ below)

D. Choose any premium channels you may want:

- | | |
|---|-------------------|
| - HBO | 1 for \$15/mo |
| - STARZ and ENCORE | 2 for \$25/mo |
| - Cinemax^ | 3 for \$30/mo |
| - Showtime, The Movie Channel and FLIX^ | All 5 for \$40/mo |
| - EPIX^ | |

^ included with Ultimate HD

2) Battery Backup Unit/PowerReserve^{*4} -- Be sure to order the Battery Backup Unit (BBU) if you would like one. *One-time charge* of about \$44.98, batteries included. Installation is at no cost if the BBU is ordered during the initial account set up call. **HIGHLY RECOMMENDED.** Note: The home you are purchasing may already have a BBU installed. Check with the current owner.

3) Telephone Service^{*5}

- a. If you are ordering telephone service only, to be installed the day after Settlement Day, ask for a 'new' telephone number at this time. (***If you are speaking with a Call Center Agent who says you may not order Telephone Only – ask to speak with a Supervisor. The HM contract allows for Phone Only and is a necessity in some cases.***)
 - b. If you are now ready to move in and had a 'new' number installed until the day after Move In Day, and you wish to bring your current number to Hershey's Mill, when ordering the remainder of your equipment and services for installation the day after Move In Day, tell the Call Center Agent you want to **keep your current phone number. Have them bring your current number over and cancel the 'new' number on installation day. (Notify Security of any telephone number changes.)**
 - c. If you are ordering and installing all services and equipment on the same day, be sure to tell the Call Center Agent that you want to keep your current phone number, if you wish to. Be sure to verify this again before you hang up; otherwise you could lose your phone number.
 - d. **Follow the Alarm Panel Test** procedures with the Tech after telephone installation. This test is required to ensure your Alarm Panel is functioning properly and to avoid daily fines. **Directions are in the document titled “Alarm Panel Self Tests”.**
- 4) Installation Date** -- The Call Center will schedule your Installation date (about ten days later or less if installing a 'new' number) at the end of your call. **Be sure to write it down and be at your Hershey's Mill home at your scheduled time.** The Techs do not call in advance. You will be given a Tech arrival time window - meaning the Techs could arrive at any time within the window. They may also be a few minutes early or late, depending on their work just before your installation.

The installation will take 2 to 5 hours depending on the number of TVs and devices you have. **You will need to have an electrical outlet** where the equipment is installed (most likely by your circuit breaker box).

ONT (Optical Network Terminal), Transformer and Battery Back Up.PowerReserve

Most homes, but not all, within HM have already had the ONT and Transformer installed and so the installation issues, if any, have already been resolved. Many will also have a Battery Back Up/PowerReserve installed. If a BBU is not installed, one is recommended. Please order one. The cost is a one time charge of approximately \$44.98 including shipping and handling. Please read the documents below on the Battery Back Up/PowerReserve units, *including how to handle the one that is mailed, for more information.*

Call Days and Times:

Days & Times: Monday – Friday: 8 am to 7 pm; Saturday: 9 am to 6 pm

Call Center Number to call: 800-501-1172

FiOS Tech Support: 1-888-553-1555

How To's, FiOS Tips and Hints, Other Instructions, FAQ's:

hersheymill.org

Attachments or see below: Pricing Schedule, Battery Back Up Info (3), Telephone Only Service & New Phone Number, Installation Day Preparation, Alarm Panel Self Test

Now that you have ordered your Verizon FiOS Services and Equipment, it is time to prepare for the Verizon Technicians visit. Please re-read the two pages below titled, "[Verizon FiOS Prepare for Your Installation](#)" and also "**IMPORTANT: TO DO During & After the Verizon Tech Installation Visit**"

Pricing.

Pricing as of
October 31, 2017 for
new customers in
Hershey's Mill.¹

Important things to remember about billing:

- You will be billed directly for services that are not included in the contract with the property.
- Shipping/handling and other charges may apply depending upon the additional products and services you order.

Contracted services

- Fios TV Package: Preferred HD
- Equipment: 1 Fios Set Top Box & 1 Fios Router
- Internet Speeds: 150/150 Mbps
- Standard Initial Set-Up Charge Waiver
- Fios Digital Voice Unlimited Plan

HD boxes

\$12.00/mo
for each box

Recording service desired

DVR	\$12.00/mo

¹Multi-Room DVR Service available in select areas.

²Availability varies. 8 Mbps network connection to your home. Actual speeds vary due to codecs, limits, network and other factors. Avg. speeds below 750-940 Mbps download / 750-880 upload. Previous customer discounts are non-transferable to the newly contracted back service order. All pricing and information shown here is subject to change and may vary for existing customers.

³TV Package Information shown reflects current channel counts for standard TV. For current channel lineups and to compare TV packages: visit [verizon.com/fios](http://www.verizon.com/fios) click on "Fios" and enter a zip code. *One-time speed availability may be limited in your area based on network qualification requirements. A technician visit may be required. Network Upgrade and other fees, terms and charges may also apply. Additional Fios TV, Internet and Voice options must be available. ©2017 Verizon. HOTS_EVS_1117

Why might I want a Battery Back Up/PowerReserve?

August 2018

There are several reasons to have a Verizon Battery Back Up/PowerReserve installed.

There is no dial tone when there is a power outage. The Alarm Panel, which has its own Battery Back Up, must have dial tone to send a signal when triggered. No dial tone = no signal sent. VoIP phone service, no matter the provider, has no dial tone during a power outage. However, Verizon has a solution for this; the BBU/PowerReserve unit.

Having a Verizon Battery Back Up/PowerReserve is highly recommended and mandatory in some villages. We want you to make a well informed decision. Here are some facts and scenarios you should be aware of:

- 1) The BBU's exceed FCC regulations.
- 2) The Life Span of the batteries is approximately 7 to 8 years.
- 3) The usable life of the batteries is approximately 34 - 35 hours.
- 4) The BBU is installed, left in the ON position and allows the Alarm Panel in our homes to send a signal during a power outage. Without the BBU installed, there is no dial tone to the Alarm Panel and so it can not function.
- 5) The BBU is a one time cost of approximately \$44.98, including batteries and installation if installed during the installation period.
- 6) There are many examples of why the BBU is desirable. Here are only two.
 - a. Scenario: The power is out, there is no BBU installed, you fall, you can not reach your cell phone, there is no dial tone to your home phone. You can reach a Red Panic Button - but it will not send a signal because there is no BBU installed providing dial tone.
 - b. Scenario: The power is out, there is no BBU installed, a fire starts in another part of the house, you do not hear the smoke alarm or smell the smoke until the fire is well underway, the smoke alarms cannot send a signal because there is no BBU installed providing dial tone.
- 7) Even if you have a cell phone, if you are away and a fire starts in your home during a power outage and there is no BBU, your neighbors are at risk because the Smoke Alarms in your home can not send a Signal. This is just one of the reasons why the BBU is mandatory in some villages.

Verizon Battery Back Ups - Update

June 1, 2018

The following information was provided by the Verizon Engineer who designed the Battery Back Up/PowerReserve.

History:

Verizon used to have a rechargeable Battery Back Up Unit. Recently, a new FCC Ruling stating that as of February 2019, all Battery Back Up units provided or sold by Telecommunications providers must last a minimum of 24 hours. The phased out BBU provided at an 8 amp draw down approximately 8 hours of support time with 4 to 6 hours of support time the norm. Rechargeable Battery Backups that will last 24 hours tend to be large, heavy and expensive to manufacture. Utilizing prior customer feedback from the now phased out Verizon Rechargeable Battery Backup Unit, Verizon developed the current Battery Back Up.

Facts:

- The current BBU uses 12 D Cell batteries (EverReady or Duracell) that are included with the unit.

- This type of battery has a 7 to 8 year shelf life when installed, without any use.
- The 12 batteries have a cumulative 34 to 35 hours usable life span when the BBU is activated by a Power failure and not used for phone calls or to transmit an alarm. It is not clear how many ‘battery hours’ an alarm signal ‘uses’ as much of it depends on the type and duration of the alarm itself.
- During a power outage, dial tone is not available unless a Battery Back Up Unit is installed, in conjunction with the Verizon ONT Box, with functioning batteries. The primary purpose of the BBU is to allow an Alarm Panel to access dial tone to communicate with the Security Panel in the Hershey’s Mill Security office if the Panic Buttons are needed or the Smoke Alarms go off. The primary purpose of the BBU is not to support casual conversation on the telephone while the power is out.
- **IMPORTANT:** The BBU does NOT provide power to electrical outlets, so Cordless Phones, Internet or anything else requiring electrical power will not work in a power failure. The base on Cordless Phones must be plugged into an electrical outlet. Dial Tone will only be evident on direct wired phones. Alarms have their own BBU. Some Villages require a BBU. BBU’s are HIGHLY RECOMMENDED.

How the BBU works:

-The BBU plugs into the ONT transformer. **The BBU is left in the ON position.** As long as there is Power to the ONT Box, the BBU remains on standby. At this point the ONT Box is drawing approximately 10.5 watts. During a Power Failure, the ONT Box goes into Power Reserve turning off the draw from Video and Internet and supporting only Dial Tone. During this time the ONT Box automatically reduces its draw down to approximately 4 to 5 watts.

-Currently, there is a Test Strip within the BBU that may be used to test the D Cell batteries, from time to time, to determine the remaining D Cell battery life. Each battery must be tested individually. There is no audible sound or light warning of declining battery life.

-The BBU is designed to be installed by a Verizon Account Holder. No disruption to the services occur if the BBU is installed while the ONT is in use. The BBU plugs directly into the ONT Transformer (most have a Blue Button to distinguish the two boxes.). A second BBU may come to you in the mail after one is installed. You must call the Call Center and have it picked up or a post paid label sent to you to avoid double billing.

****New Improved Model:** should be available by the end of 2018. The new model will functionally be exactly the same as the current model. It will have three LED lights and a Test Button to show how much battery life is remaining: full, middle or close to end of life. The BBU will look the same except for the LED lights. Pricing is not expected to change significantly. The new model will be sold at the then posted price. If you wait to order the new model and request a Tech to install, there will be a service charge for the Tech to come out just to install the BBU.

Battery Back Up/PowerReserve Pick Ups

(Do Not Call 1-800-Verizon or the Call Center or FiOS Tech Support.) The instructions and phone numbers below are Only for BBU's.

August 2018

TO DO:

The normal way Battery Back Ups/PowerReserves (BBU) are handled by Verizon, when ordered, is to mail them to the ordering address. BBU's are not stocked in the local Operations facilities, so the Techs normally do not have access to them directly. As a courtesy, the Malvern Operations Manager stocked a few, so that Techs could provide and install them when they came to install the rest of your equipment.

The mailed BBU's trigger the request we make of each home owner to be certain that a BBU was indeed installed and is in the On position. (Techs are human, they make mistakes.) The BBU/PowerReserve is plugged into the Transformer located next to or near the ONT (Optical Network Terminal). All three boxes tend to be black in color. If you do not have three boxes, you do not have a BBU installed.

The BBU has an ON/OFF Toggle switch. ON is when the toggle switch is depressed on the On side. If the BBU is in the Off position, please turn it on. The Techs are human and they do make mistakes. They may have forgotten to install the BBU or may not have turned it on.

Having the Mailed BBU Picked Up

When BBU is verified, the BBU's that were mailed are picked up from the front porch when you call for Pick Up. Having the BBU picked up prevents a double charge. No receipt is given. Over 1000 have been picked up this way and no one has been double charged.

If you are able to verify that the BBU is in the ON position, please request Pick Up by calling this number and leaving a Voice Message with your Request for BBU Pick Up, Name on the Account and HM Street address. Speak slowly and clearly and repeat the address. Then place the BBU, protected from the weather, on your front porch. It will be picked up. No receipt is provided. Over 1000 have been picked up and no one has been double billed. If the BBU is not picked up within ten days, please call the same number and leave a second message with the same information. This is rarely necessary but may be necessary occasionally. No one will call back from a message left on this number. This is an incoming message only number. A Tech will be assigned to pick up the BBU when in HM on other business. **These are incoming /leave a message only numbers. Call: 610-644-5914 or 610-383-6810.**

BBU is Not Installed – How to have the mailed BBU Installed:

If you find that the BBU is not installed, call the telephone number below and leave a message explaining that the BBU was not installed and request that a Tech visit to install the one received in the mail. If this is the case, please provide your Name, Address and Contact Telephone number when you leave the Request message. A Tech will be assigned. Please answer your phone, even if you don't know who is calling, until you make contact with a Tech. They do not leave return call phone numbers. A Tech may also knock on your door when in HM on other business. **These are incoming /leave a message only numbers. Call: 610-644-5914 or 610-383-6810.**

Not able to locate or verify if a BBU has been installed:

If you are not able to verify, a Tech will visit to double check when you leave a message requesting a check by a Tech. Call the telephone number below and leave a message explaining that you are not

able to verify if the BBU was installed or if it is On and request that a Tech visit to install the one received in the mail. If this is the case, please provide your Name, Address and Contact Telephone number when you leave the Request message. A Tech will be assigned. Please answer your phone, even if you don't know who is calling, until you make contact with a Tech. They do not leave return call phone numbers. A Tech may also knock on your door when in HM on other business. **These are incoming /leave a message only numbers. Call: 610-644-5914 or 610-383-6810.**

The Tech will either install the BBU or verify that it is in the ON position and retrieve the BBU that arrived in the mail.

Not done within 10 business days from when you left a message?

If the BBU is not Picked Up or you do not receive a knock on the door or a call from a Tech when a Tech visit is required within 10 business days of leaving your message, please call back and leave All of the same information again.

Here is what is needed for you to leave in your message: Remember – No One will call you back. You must leave all of this information in your message.

- 1) Exactly what you need in reference to the BBU
- 2) The name on the Account and your name if different
- 3) The Street Address within HM
- 4) Your Contact telephone number

These are incoming /leave a message only numbers. Call: 610-644-5914 or 610-383-6810.

Please print out and Keep the following 5 Pages. Use them as Reference and Support Informational Documents.

Alarm Panel Self Testing Protocol **Is Highly Encouraged Twice a Year***

Hershey's Mill Home Owners/Residents Responsibility

IMPORTANT NOTE: There are two parts to obtaining a Pass Test result. The first is line seizure, the second is an alarm being received by the Main Security Panel in the Security Office after line seizure.

- 1) Using your Home Phone Line, the Home Owner is to call Security at: **610-436-6403**
 - a. Give your name and address to Security,
 - b. Inform Security that you are testing your Security System.
 - c. Then push a Red Panic Button While On The Phone with Security. The Alarm System must override the phone line and Security must receive an alarm from your address for a positive test result.
- 2) If your phone connection with Security is not immediately cut off after pressing the Red Panic Button, the Line Seizure has failed. Call your Managing Agent or Village Council and ask for next step instructions. It is the Home Owners responsibility to get the Alarm System or Interior Wiring that may be causing the issue repaired immediately.
- 3) If the line was seized, meaning you were cut off from speaking with Security, wait two minutes before calling Security again and confirm that they received an alarm. If an alarm was received by Security, the Test worked, no further work is required on your part. **610-436-6403**
- 4) If either part of the Test fails, the Alarm System failure must be addressed. Call the Village Managing Agent for further instructions. The proper functioning of your Alarm System is the Home Owners responsibility. Follow through. Make sure the proper steps are taken to have proper protection for your own personal safety and the safety of your neighbors.

When to Call:

The Test Times are Monday through Sunday, 10 am to Midnight.

How to Call:

Call from your home telephone number. Please call the Security Office, Monday through Sunday, 10:00 am to Midnight at **610-436-6403**

Number to Call:

Call this Special Security Check Phone Number: **610-436-6403**

***Alarm Panel testing is also highly encouraged any time any electrical work, telephone work of any nature or any other utilities work is done in the home.**

Verizon FiOS Prepare for Your Installation

IMPORTANT: READ ALL PAGES IMMEDIATELY

August 1, 2018

Important: After placing your Verizon order: You **will receive an appointment confirmation either through email or a text on your cell phone.** You **MUST CONFIRM** the installation appointment.

Be Prepared: Have everything in your home that needs to be connected to Wi-Fi charged and available. **Make a list.** **Memory jogger:** Laptops, Tablets, iPads, Kindle's, Computers, Thermostats, Mobile or Cell Phones, Printers, Smart Home Devices, Smart Medical Devices, Universal Remotes. If something gets missed, see Wi-Fi instructions below. Subsequent visits to assist connecting personal equipment to WiFi will incur a Service Charge.

Questions after Installation: **Account & Billing: 1-800-501-1172**

FiOS Technical Service questions: **1-888-553-1555.** **On Line Account** questions: **1-866-326-7937**

Hershey's Mill Home Owners/Residents Responsibility When Verizon Techs Enter Your Home

Please Read ALL Pages of This Handout

Security System – Testing of the Security System is Not Optional*

*If you chose not to test the Security System in the Verizon Tech's presence, then you are responsible if the Security System does not work when the Installation is complete. This could result in a daily fine of \$25.00.

1) When the Verizon Tech enters your home and before they begin work, inform the Tech that you will now check the Security System. This must be done in the Tech's presence. Note: If the Security System does not work then the Tech is not responsible to make it work when done with the transition. Whether the Security System works or not, the Tech will continue with the transition. **NEW**

RESIDENTS: If there is Dial Tone, Test according to these instructions. If there is No Dial Tone, Skip to #4 and inform the Security Office that this will be the only test: (610-436-6403)

2) Testing Protocol:

a. Home Owner or Tech, in each other's presence to call Security at **610-436-6403***

- give your name and address to Security,

- inform Security that you are testing your Security System at the **START** of Verizon transition.

b. Then push a Red Panic Button While On The Phone with Security. The Alarm System must over ride the phone line and Security must receive an alarm from your address.

c. Next call Security back, wait 60 seconds and dial **610-436-6403**. Confirm that an alarm was received. If the Test works, then the Security System must work before the Tech leaves the home.

3) Just before the Verizon Tech leaves your home, ask the Tech to witness while you re-test the Security System by following the exact same protocol as above:

a. Home Owner to call Security, **610-436-6403**,

- give your name and address to Security,

- inform Security that you are testing your Security System at the **END** of Verizon transition.

b. Then push a Red Panic Button While On The Phone with Security.

c. Next call Security back, after waiting 60 seconds. Confirm that an alarm was received.

4) If the Security check works, all is well. If the Security System fails, and it was working when the first test was done when the Tech arrived, then the Tech works to correct the Security System failure. Repeat the above test if necessary.

IMPORTANT: TO DO During & After the Verizon Tech Installation Visit

Ask for a Welcome Packet. The Channel Guide is in the Welcome Packet

Pre & Post Verizon FiOS Installation Information and Frequently Asked Questions: Read below and

visit Hersheymill.org for many more Tips and Answers **Please Read This Entire Handout**

Before the Tech leaves: Test Everything

Pick up every telephone extension and be sure you have Dial Tone.

Turn on every TV and make sure you have signal.

Print something—be certain the printer works and connects to whatever devices you print from.

Check every device you access the Internet from and be certain everything connects to the Internet.

Check everything on your list. Be certain everything is working before the Tech leaves. A return visit by a Tech will incur a service charge if it is not a Verizon equipment repair call.

Check the BBU. **Have the Tech show you** how to change batteries and that the BBU is in the ON position.

Electrical Receptacles: Double check to be certain which electrical receptacles equipment is plugged into. If anything is plugged into a top electrical receptacle, remember these are controlled by the wall switch and will turn off anything plugged into an upper electrical receptacle when the wall switch is turned off.

Battery Back Ups: If you ordered a Battery Back Up/PowerReserve one will be installed during your installation. Make sure the Tech SHOWS YOU the BBU. You may also receive one in the mail. To avoid double billing, when the Battery Back Up is received call 1-800-501-1172 to have the extra BBU picked up.

Print Out and Keep the KEEP SHEET below.

Hershey's Mill Verizon FiOS KEEP SHEET

July 17, 2018

Reference sheet to be provided in the Home Documents and stay with the property when sold or rented.

Do Not Call 1-800-VERIZON for any reason. Contact Phone Numbers:

Call Center - 1-800-501-1172 for Account and Billing questions, upgrades, downgrades, changes in equipment or services. *If you do not feel that the Agent understands what you need or how to deal with your concern, ask to speak to a Supervisor.*

FiOS Tech Support: 1-888-553-1555 Hint: When you call this number, after verifying which telephone number is associated with your account, ask for Agent or Rep until a live person comes on the line. If there is a long wait time, use the Call Back feature. The first step to solve any technical issue is to call this number. When on the phone with you, the Techs can send a signal through to your home, determine the problem and walk you through step by step solutions or repair over the phone. They can access your account to see if a setting is wrong and correct it if necessary.

On Line Account Access: 1-866-326-7937 For Online Accounts; setting up, passwords etc.

Hersheymill.org; FiOS Tips – has postings with solutions to common issues, instructions, great things to know, how to do them and more. More information on back.

*****Most Common Questions, Answers & Solutions: TV, Phone & Internet*****

Channels: Special Channels – Where is my Station?

HMCTV formerly Channel 20 = 1970/1971; NetFlix = 838; Game Show Network (Ultimate Channel Lineup Only) 184/684; TCM (Turner Classic Movies - Preferred & Ultimate Channel Lineups) 230

Wi-Fi – How to Connect to your Wi-Fi

LOCATE the wireless network name and password on the side of your router.

LAUNCH the Wi-Fi application on your device.

SELECT your network name from the list of networks.

ENTER your Wi-Fi password and select Connect.

WATCH a video at Verizon.com/wifivideo for more information

Television: Opening Banner that says to Press Menu when you turn your TV ON

To remove the opening banner and turn off the Sleep Timer:

On the TV Remote: Depress the "Menu" button on the Remote

Go to 'Settings' using the Arrow Buttons; then Depress the OK Button

Go to 'System'; Depress the OK Button

Scroll to 'Media Server Settings'; Depress OK Button

Scroll to 'Auto Power Off'; Depress OK Button

Scroll to "None"; Depress OK Button

Depress 'Exit' button on the Remote

MOVING or SELLING Your Home? We are all required to maintain telephone connection through Settlement Day. All other services may be cancelled, and equipment may be returned, as long as telephone service is maintained. Phone is included in the Bulk Plan. (Hersheymill.org)

[More on the Back](#)

Caller ID: How to Set Up FiOS Caller ID on the Television Notification:

On The Remote: Depress the ‘Menu’ button

Go to ‘Settings’, Depress the OK button

Go to ‘Caller ID’, Depress the OK button

Go to ‘Check Availability’, Depress the OK button

Go to ‘Alert Display’, Depress the OK button

Go to ‘Enable’, Depress the OK button

Scroll to ‘Alert Duration’, Depress the OK button

Scroll to the Number of Seconds desired, Depress the OK button

Press ‘Exit’ on the Remote

TV Not Working: Static or Snow Or Message on TV that says: NO Signal

The TV is most likely receiving signal from the incorrect HDMI Input.

To correct this, on the REMOTE:

Depress the Small White button on the lower left of the Standard Remote labeled “TV Input”.

Continue to Depress this same button until the correct HDMI Input is highlighted on the TV Screen, then Depress the OK button on the remote.

Depress Exit to return to Live Programming.

If this does not correct the Signal reception, unplug and re-plug the cable that goes from the Set Top Box to the TV. Wait for Two Minutes.

IMPORTANT: If the Signal is still not being received, follow the steps above again.

As a last resort, Call FiOS Tech Support 1-888-553-1555

TV will not turn On: Check to be sure it is plugged in, that the wall switch is in the up position, cable between TV & Set Top Box is plugged in securely and that the correct Remote paired with the TV is being used to turn it on.

No Dial Tone

- First, please check to be sure all extensions are properly hung up. This is the most common cause. Phones can look like they are hung up and are not. It will take a moment for the dial tone to return, if an extension was off the hook.
- Second, check to be sure all extensions are plugged in or if they are plugged in to the top electrical receptacle, that the wall switch is turned on.
- Third, please call Tech Support (1-888-553-1555) from another phone (cell, neighbors). Tech Support will run a signal and either repair or instruct as to what has to happen next.
