

Cable Cards

February 2018

Cable Cards are, as of this writing, available through Verizon for a monthly charge of \$4.99.* Any resident desiring a cable card and possessing the appropriate equipment to utilize a cable card must order these during their individual account set up call. A Cable Card may not be substituted for the included Set Top Box. *Prices, as always, subject to change.

For those that own their own cable cards: the cards may or may not be compatible with Verizon's service. There may only be two types of cable cards on the market. Verizon is not able to verify in advance if any particular cable card, other than the ones they have, is compatible with their system. Please contact the manufacturer of your cable cards to verify compatibility.
