

## **Router – Location within a home and Use of Extenders**

August, 2018

Depending on the construction of your home, there is no guarantee that the Router may be located or relocated to the specific location you prefer. The Verizon Routers must have a more robust cabling because of the 150/150 Internet speed. The cabling that the previous providers utilized were, in most cases, installed when the homes were being built and now it may or may not be possible to run the Ethernet cabling required for the higher internet speeds to the same location or a different location. In rare cases, the rewiring/cabling that must be done to relocate the Router may be a service charge. If this is the case and you wish the cable to be relocated to accommodate the preferred Router location, the Verizon Tech may do it or Security has provided us with a list of companies that run cabling and have worked in HM.

In some homes, depending on construction, an Extender (sometimes called a second Router) may be necessary to provide WiFi to all areas of the home. Extenders may be purchased through Verizon for approximately \$99, plus shipping or rented monthly for approximately \$6.00/month. All prices subject to change, of course. Contact Verizon at 1-800-501-1172 to purchase an Extender.

***Reminder, please check the WiFi in all areas of your home before the installing Techs leave.***

### **In Home Cable Installation & Alarm Repair Companies compiled by the HM Security Director**

August, 2018

**NOTE:** All wiring and cabling within our homes are owned by individual home owners. If you want a cable or wire run to a new location the companies listed below have done work in HM.

Tom Saulino.

[484-467-9328](tel:484-467-9328) Rate: Approximately \$60/hr.
