INTRODUCTION TO THE NATIVE PLANT & POLLINATOR GARDEN

- Derek Stedman
- Barbara Crispin
- Sue Staas
- > Jim DiCarlo

WHERE IS THE NATIVE PLANT & POLLINATOR GARDEN?

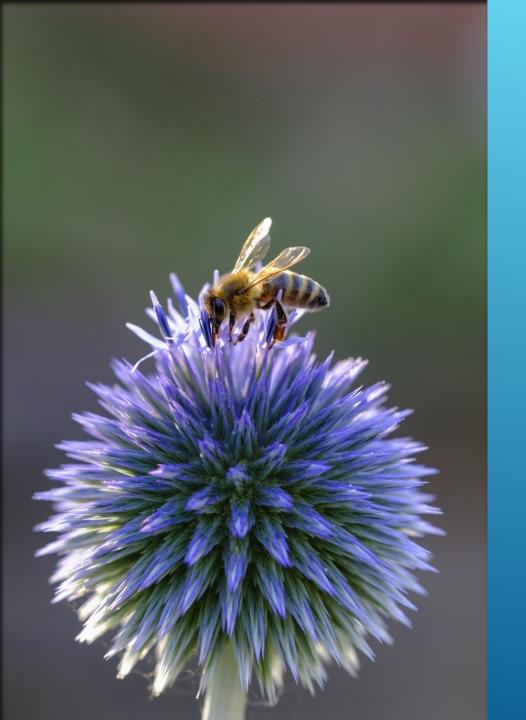

A BIRD'S EYE VIEW

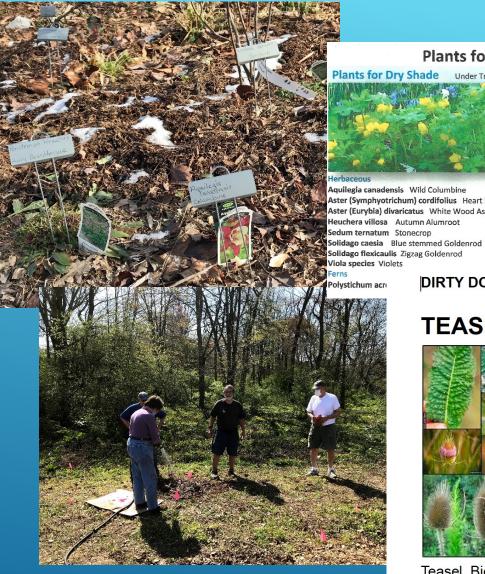

To encourage you to take small steps toward renewing our native wildlife by adding HOA-friendly native plants within Hershey's Mill

OUR PURPOSE

OUR GOALS

EDUCATION

Plants for Challenging Conditions

Under Trees. In a Dry Woodland. Will also work in moist/average conditions.

Aquilegia canadensis Wild Columbine Aster (Symphyotrichum) cordifolius Heart leaved Aster Aster (Eurybia) divaricatus White Wood Aster

Heuchera villosa Autumn Alumroot Sedum ternatum Stonecrop

Solidago flexicaulis Zigzag Goldenrod

DIRTY DOZEN WEEDS ID CARDS

Grasses

TEASEL

Calycanthus floridus Carolina Allspice, Sweetshrub

Rhododendron calendulaceum, R. periclymenoides

Clethra alnifolia Summersweet Clethra

Gaultheria procumbens Wintergreen

Carex pensylvanica Pennsylvania Sedge***

Fothergilla gardenii Fothergilla

Teasel. Biennial invasive.

DEMONSTRATION

- Original pollinator garden
- Soon to be planted with HOA-friendly native plants
- Shorter varieties,
 concentration on
 flowering & year-round
 interest in the villages

CRAZY QUILT GARDEN

- Strictly uses native plants
- More suitable for common areas, rain gardens, and woodland borders

NATIVE PLANT GARDEN

FUTURE WOODLAND GARDEN

Boardwalk to creek with observation deck for birdwatching & enjoyment of time spent among the trees.

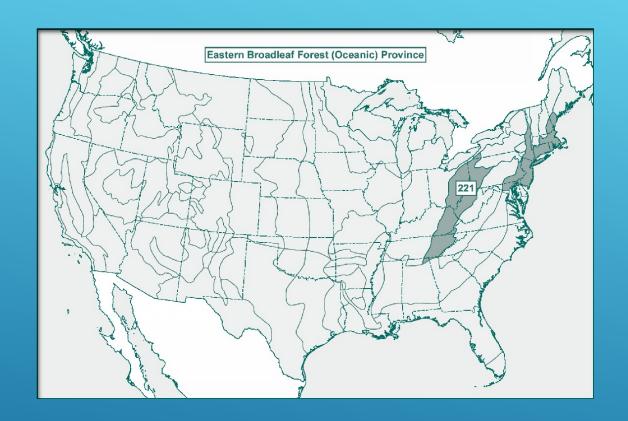

INTRO TO NATIVE PLANTS

- Region 221 in Bailey's Ecosystems Provinces
- Massachusetts to Ohio, New Hampshire to Maryland, Tennessee & West Virginia
- Trees, shrubs, vines, flowers, ferns and moss growing here prior to the arrival of Europeans to North America are our Native Plants.

EASTERN BROADLEAF FOREST

Root Systems of Native Plants Turf/Lawn Little Prairie Bluestem Dropseed Switchgrass Indian Grass Diagram referenced from the "Conservation Research Institute"

NATIVE PLANTS

- Are adapted to a region's growing conditions
- Have a stronger root structure
- > Require less care
- Provide food and shelter for native wildlife

- Flowers offer nectar to bring insects and birds close.
- Pollen is brushed off/brushed on these flower visitors & carried to the next flower where the process continues.

NECTAR & POLLEN PLANTS

Pollinators land & collect pollen with bits of previously collected pollen brushing off at each stop to complete the process.

EARLY POLLEN SOURCES

Pollinators land & collect pollen with bits of previously collected pollen brushing off at each stop to complete the process.

LATE POLLEN SOURCES

- > Host plants for caterpillars
- > Plants produce toxins to prevent being eaten
- Native insects and plants co-evolved
- No Milkweed=no Monarchs

LARVAL PLANTS

SEEDS FOR BIRDS

Ripe seed heads provide winter food

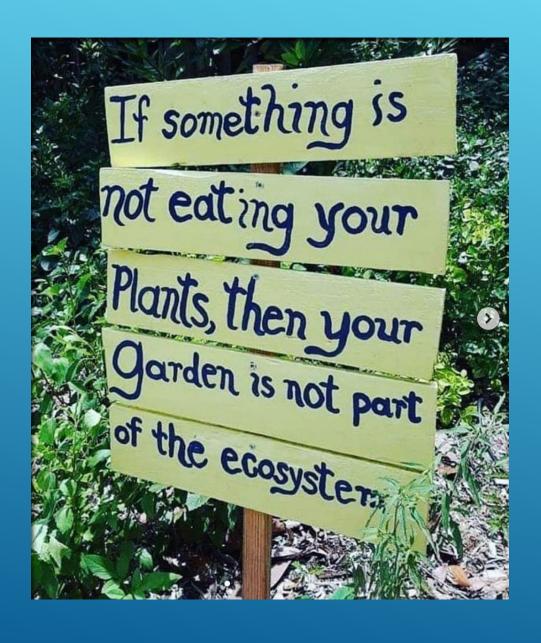

- > Grasses
- > Redbuds
- > Oaks
- > Hemlocks
- > Pines

SHELTERING & NESTING

- We plant, weed, water, tag, promote visits, & observe health & activity in the garden.
- We write articles for the Guide and Digest, publish plant lists, & talk with HM residents about gardens.

SAY HELLO TO THE NATIVE PLANT & POLLINATOR GARDEN VOLUNTEERS

- ► Easiest to grow
- ▶ Busiest flowers
- ► Crowd favorites?

WHICH POLLINATORS?

WHERE TO PUT THEM?

- Native plants aren't just for meadows & woodland anymore.
- Our HOA-friendly native plant list promotes shorter cultivars suitable for front yards & sidewalk flower beds and includes sun & moisture recommendations.
- It will be posted on the HMNG website for easy reference.

Local nurseries & plant sales:

- > Brandywine Museum plant sale
- Stoneleigh/Natural Lands plant sale
- > Tyler Arboretum plant sale
- > Redbud Nursery

Where do YOU go?

WHERE TO GET THEM?

Garden Certifications

- Connect HMNG to national organizations & resources
- Encourage neighbors to work together for the benefit of our community wildlife
- Each village & homeowner can register their garden, yard, and/or common area to join the effort to build a more resilient ecosystem

Spring Kickoff: April 8 & 9 (Rain or Shine)

April 8, 7 PM @ Community Center: Jennifer Nichols, GreenWeaver Landscapes, will talk about the importance of native plants & tips for adding native plants to our gardens/common areas this year.

April 9, 10 AM to Noon @ Native Plant & Pollinator Garden:

- > Walk the garden paths & see spring's progress.
- > Share this year's gardening news & goals.
- > Handouts available.
- > And more....

A HM bus trip is scheduled to tour the formal gardens, testing gardens, woodland, and meadows of Mt. Cuba in Delaware. See bus trip listings for more information.

MAY 12: BUS TRIP TO MT. CUBA

A HM bus trip is scheduled for a guided tour of the gardens and main house at Stoneleigh: A Natural Garden in Villanova. See bus trip listings for more information.

SEPTEMBER 7: BUS TRIP TO STONELEIGH: A NATURAL GARDEN

Let's Talk!!
